

CABLE AND BAND TENSION METERS

CABLE AND BAND TENSION METER - BTM Series

For cable and band tension measurement

Ranges available up to 500 lbs.

The Band Tension Meter is used for measuring tension on metal tapes or many wires/yarns in parallel. This instrument is ideal for use with bands, flat cable, and flat conductors as well as round wire/cable configurations. The contact rollers can be made up to 2" long or the instrument can be outfitted with a variety of small grooved pulleys for round wire and cable applications. Tensitron's application specialists can assist in customizing an instrument for your unique requirements.

- * Durable solid anodized aluminum construction.
- * Easy-to-read dial in lbs or kgs.
- * Sturdy handle for ease of use on moving materials.
- * Typical weight – 2 lbs 14 oz.
