

2. Centrifuge

2.1. Mini Centrifuge

4K/6K/10K Single Speed Mini Centrifuge

Descriptions:

4K/6K/10K single speed mini centrifuge is widely used in physical and chemistry analysis, biochemistry, cellular and molecular biology, clinical Labs and blood donation centers. Powerful and easy-to-use single speed mini centrifuge is small enough so that each workstation can be equipped with a “personal” centrifuge for a wide range of molecular biology separations and quick spins.

Specifications:

Items	Models	Speed	RCF
L2096	4K	4000rpm	770×g
L2097	6K	6000rpm	1700×g
L2098	10K	10000rpm	4800×g
Remark	Speed accuracy		±50rpm
	No.1 Angle rotor		6×2.0ml/1.5ml/0.5ml/0.2ml
	No.2 Angle rotor		2×8×0.2ml
	Power supply		AC100~240V, 50/60Hz
	Overall dimensions		17×15×13cm
	Quantity per carton		4pcs
	G.W.		6kg
Packing dimensions		44×40×36cm
